

wolf drapery

About Us

Wolf Drapery was built from our second-generation, family run business, where we have been handcrafting custom Draperies and Roman Shades for the integration community for nearly two decades. Our highly skilled craftsmen and craftswoman are dedicated to blending the lost art of making draperies with the technology of tomorrow. All of our draperies, Roman shades and decorative rods are proudly handmade in the U.S.A.

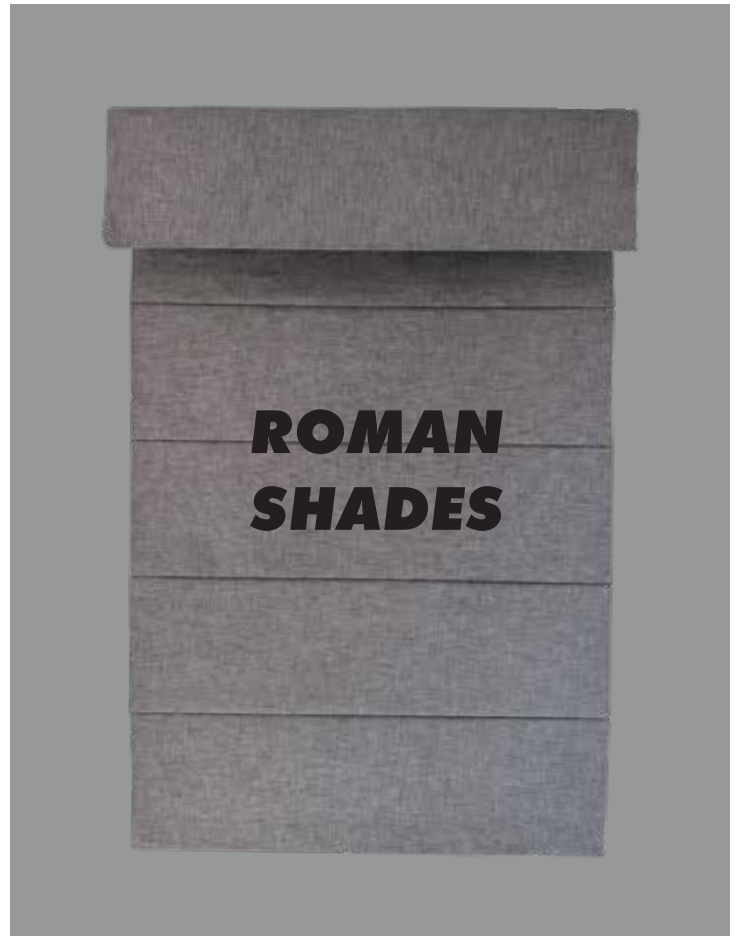

Mission

Wolf Drapery helps dealers take their window coverings business to the next level by seamlessly integrating Drapes and Roman Shades to their projects. We understand the complexities of automated window treatments and provide dealers with custom made solutions and products, made specific for their favorite brand motors. Wolf also provides dealers with the tools they need to be successful in selling their clients everything for their window covering needs.

Vision

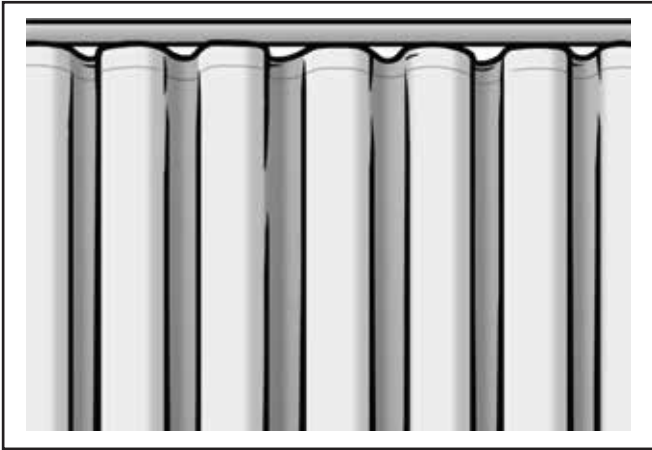

What makes us extra special to Technology Integrators is our two decades working with automation systems. We've been motorizing and automating drapes and shades for commercial and residential accounts from high-rise buildings, to retailers to luxury homes for nearly three decades.

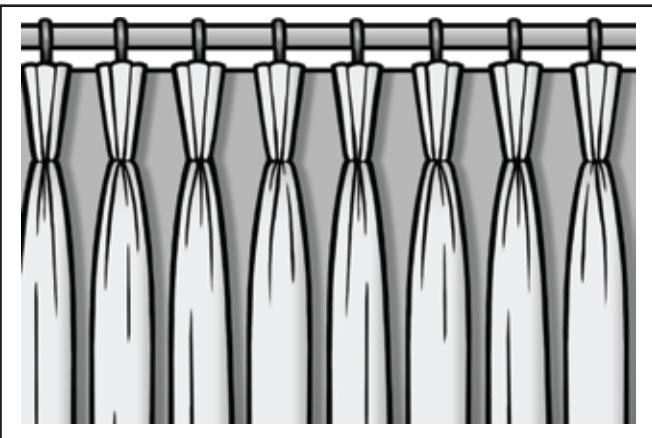

RIPPLEFOLD

Ripplefold style drapes are named for their soft, consistent ripples produced by sewing snaps to the top hem that are then snapped on to the carriers of a track with a precise spacing creating an undulating wave pattern. Available in 80%, 100% and 120% fullness for a very modern look that is very easy to install.

PINCHPLEAT

Pinch Pleat style drapes are named for their permanently sewn pleats that are tacked about 4" from the top and flare out creating a very tailored traditional look. A drapery pin is then attached behind each pleat and hooked onto the track. This is great for thicker, heavier fabrics but take more time to install.

DRAPERIES

Custom draperies made to the exact specifications of any brand motorized track. Made from your clients own fabric (C.O.M.) or choose from our specially curated collection of fabrics.

FLAT FOLD

FLAT FOLD WITH BATTEN BACK

HOBBLED

ROMAN SHADES

Roman shades can be made using the same or coordinating fabrics as drapes or decor, offering dealers an alternative to plain roller shades, with options for visible or hidden folds, motorization from Lutron, Crestron, and Somfy, and a design that folds up in evenly spaced sections for a soft, decorative look. Made from your clients own fabric (C.O.M.) or choose from our specially curated collection of fabrics.

FABRICS

Explore our specially curated collection of fabrics that combine luxury, style and performance with over 500 patterns and colors to pick from.
